2	21	10,000 +	3
Registered Practitioners	Years Combined Experience	Patients Treated (China Tertiary Hospitals)	Days / Week On-Site

Presented to: Nursing Home / Care Centre Management

2026

1. Who We Are

We are two Registered TCM Practitioners with the Malaysia Traditional & Complementary Medicine Council (T&CM; Council), both graduates of Shanghai University of TCM, trained in Shanghai's top tertiary TCM hospitals. We bring a dual-specialty team — Orthopedics & Traumatology + Gynecology — to nursing homes across Johor.

Core Strengths

Complementary Dual Specialties	Orthopedics (Practitioner Vincent) + TCM Gynecology (Practitioner Natalia). Two practitioners, two specialties, covering the most common health needs of both male and female elderly residents.
Authentic Shanghai TCM Heritage	Practitioner Vincent studied under Dr. Zhang Ting, 4th-generation inheritor of the nationally intangible cultural heritage "Shi's Orthopedic Tradition" — a premier Shanghai TCM lineage.
High-Volume Clinical Training	In Shanghai's tertiary hospitals, we treated 60+ patients per day and over 10,000 cumulative cases — covering neck/back pain, stroke sequelae, chronic diseases, and geriatric gynecology.
Regulated & Cross-Border Experience	Practitioner Vincent previously practiced in Singapore. Both practitioners are registered with Malaysia T&CM; Council under Act 775, legally permitted for on-site resident care.

Shanghai Tertiary Hospital Training Background (by practitioner)

Practitioner Vincent Shihong	Practitioner Natalia Caien
• Longhua Hospital Affiliated to Shanghai University of TCM • Shuguang Hospital Affiliated to Shanghai University of TCM • Yueyang Hospital of Integrated TCM & Western Medicine • Shanghai Municipal Hospital of TCM • Renji Hospital Affiliated to Shanghai Jiao Tong University School of Medicine	• Longhua Hospital Affiliated to Shanghai University of TCM • Yueyang Hospital of Integrated TCM & Western Medicine • Shanghai Municipal Hospital of TCM • Shanghai Guanghua Hospital of Integrated TCM & Western Medicine

2. Practitioner Vincent Kiing Sii Hung — Profile

Practitioner Vincent Kiing Sii Hung · 2nd Shanghai Medical Association Sports Medicine Forum (2023)

Credentials

- Registered TCM Practitioner, Malaysia T&CM; Council (Reg. No. PTC-PPB2024/07214)
- Master of Medicine in TCM Orthopedics & Traumatology, Shanghai University of TCM
- Senior Shanghai Tuina (Chinese Medical Massage) Practitioner License (10 years)
- 13 years of clinical experience in Shanghai
- Previous TCM practice experience in Singapore

Lineage

Trained under Dr. Zhang Ting, 4th-generation inheritor of the "Shi's Orthopedic Tradition" — a nationally recognized intangible cultural heritage of Shanghai TCM. The tradition emphasizes integrated bone-and-muscle care and is renowned for cervical/lumbar spine disorders, knee arthritis, and post-fracture rehabilitation.

Clinical Expertise

Orthopedics

Cervical/lumbar spine disorders, rotator cuff injury, knee osteoarthritis, acute/chronic sprains, post-fall soft-tissue injuries, post-surgical rehabilitation, stroke-related motor recovery.

Tuina & Manual Therapy	Shi's-style manipulation, joint mobilization, soft-tissue release — non-pharmaceutical relief for limited mobility and chronic pain in the elderly.
Acupuncture	Stroke sequelae, facial palsy, insomnia, constipation, urinary incontinence, neuropathic pain.
Herbal Medicine	Hypertension, diabetic complications, GI disorders, recurrent colds, sleep disorders — personalized constitutional treatment.

In Shanghai: Treated 60+ outpatients daily, covering orthopedic clinics, inpatient wards, and consultations — extensive hands-on experience in post-fall recovery, chronic back pain, and stroke rehabilitation.

3. Practitioner Natalia Yii Cai En — Profile

Practitioner Natalia Yii Cai En · 2024 China-ASEAN Traditional Medicine Innovation Conference

Credentials

- Registered TCM Practitioner, Malaysia T&CM; Council (Reg. No. PTC-PPB2026/15538)
- Master of Medicine in TCM Gynecology, Shanghai University of TCM
- 8 years of clinical experience

Clinical Training Background

Completed standardized gynecology and internal medicine training at Longhua Hospital, Yueyang Integrated TCM-WM Hospital, Shanghai Municipal Hospital of TCM, and Shanghai Guanghua Integrated TCM-WM Hospital, including outpatient, inpatient, and consultation duties.

Clinical Expertise (Geriatric Women & Chronic Disease)

Geriatric Gynecology	Post-menopausal osteoporosis risk, recurrent UTIs, pelvic floor weakness, post-menopausal mood and sleep issues.
Chronic Disease Care	Hypertension, diabetes, thyroid nodules, breast hyperplasia, GI disorders, recurrent infections — constitutional TCM management.
Acupuncture & External Therapy	Insomnia, anxiety, depression, constipation, urinary incontinence, joint pain.
Herbal Prescription	Personalized herbal formulas based on tongue/pulse diagnosis, integrated with dietary and lifestyle guidance — ideal for long-term nursing-home follow-up.

Value in nursing homes: Female residents often make up the majority in mid-tier private and community care homes. Practitioner Natalia fills the gap in geriatric women's endocrine, urinary, and emotional health — completing the "orthopedics + gynecology" loop.

4. Why a Dual-Practitioner Model

A single practitioner can only cover one specialty. Our dual-team model is designed specifically for nursing-home settings.

Dimension	Practitioner Vincent Shihong	Practitioner Natalia Caien
Specialty	TCM Orthopedics Master	TCM Gynecology Master
Experience	13 years + 10-year Senior Tuina License	8 years
Common Concerns	Falls, back/joint pain, stroke recovery, mobility issues	Insomnia, mood, urinary issues, osteoporosis risk, chronic disease
Main Methods	Manipulation, Tuina, Acupuncture, Herbs	Herbal diagnosis, Acupuncture, Constitutional care
Signature	Shi's Orthopedic Heritage · Singapore practice	Shanghai-style Gynecology · Long-term geriatric management

Three Things That Set Us Apart

- Not "just herbalists": Practitioner Vincent's Senior Tuina License and Shi's-style manual therapy deliver same-day relief at the bedside — no waiting for herbs to work.
- Not "only neck-and-shoulder": With 10,000+ cumulative cases, we routinely handle complex cases — stroke sequelae, post-fall rehab, chronic geriatric conditions.
- Not "lone operators": When a resident has both back pain and insomnia, both practitioners confer on the spot — no referrals, no waitlists.

5. What We Solve for Your Nursing Home

Mid-tier private and community care homes face not major illnesses, but recurring small issues — chronic back pain, insomnia, constipation, fear of walking after a fall, low mood. None are life-threatening, but all drain care staff, reduce family satisfaction, and hurt occupancy.

Common Pain Points	How Resident TCM Helps
Residents fear walking after falls; chronic back/joint stiffness	Manual therapy + acupuncture + rehab guidance shorten recovery and reduce re-fall risk.
Chronic insomnia, low mood, constipation, poor appetite	Herbal diagnosis + acupuncture improve sleep and GI function, reducing reliance on sleeping pills and laxatives.
Frequent hospital trips for chronic conditions; family complaints	On-site rounds and constitutional care catch small issues before they become emergencies.
Care staff unsure how to identify common geriatric symptoms	We train care staff: what to observe, when to refer, when to send to hospital.
No differentiator vs. competitors	"Registered TCM practitioner on-site" is a tangible marketing point for your brochures.

6. Partnership Models (Three Tiers)

We offer three partnership tiers for nursing homes of different sizes and needs. They can be used individually or combined. All on-site practitioners are Malaysia T&CM; Council registered.

Package	Format	Best For
TCM Visiting Per-visit	3 fixed days/week, Mon–Sat (Sun rest); minimum 10 residents per visit; billed per resident served.	New partnerships / trial period; mid-size homes with scattered pain complaints.
Monthly Care Ongoing Monthly Care	2 fixed days/month long-term on-site, quarterly/semi-annual contracts; health records for priority residents; discounted long-term rate.	Stable occupancy with chronic-disease residents needing ongoing care; integrating TCM into daily care.
Wellness Screening Day Health Event	Single-day event: free health talks (fall prevention / chronic-disease diet / winter wellness) + on-site blood-pressure & tongue/pulse screening + consultations.	Open houses, family visit days, brand events, or add-on to Monthly Care.

Elderly Resident Concession Rate (Bulk Rate)

Item	Standard Outpatient	Nursing-Home Resident Rate (20+ residents)
First visit (assessment + initial treatment)	RM 50	RM 25
Follow-up visit	RM 30	RM 15

* Base consultation fee. Tuina / Acupuncture / Moxibustion / Cupping / Herbs are added per the day's treatment mix. Monthly Care contracts receive additional long-term discount. Minimum 10 residents per visit; 20+ residents automatically qualify for the elderly bulk rate. Final pricing subject to mutual agreement.

Included in Every On-Site Visit

- Clinic: Dedicated treatment space within the facility; residents booked by appointment or care-staff referral.

- Bedside Rounds: Assessment and manual therapy/acupuncture for bed-bound or immobile residents.
- Health Records: Simple TCM files (tongue/pulse, constitution, treatment response) maintained with PDPA-compliant privacy.
- Care-Staff Training: Monthly 1-session briefing on fall prevention, pain recognition, and hospital-referral triggers.
- Family Communication: Progress updates to families on request, building trust and satisfaction.

7. TCM Services We Provide On-Site

Services available on-site at your facility. Elderly concession rates (first visit RM25 / follow-up RM15) are listed on page 6; treatment mix is determined by the practitioner based on residents' needs.

Modality	Common Geriatric Applications
Tuina (Medical Massage)	Neck/shoulder/back pain, joint stiffness, muscle strain, post-stroke mobility
Acupuncture	Insomnia, constipation, urinary incontinence, neuropathic pain, facial palsy, stroke sequelae
Moxibustion	Cold intolerance, weakness, recurrent colds, GI cold-deficiency, joint pain
Cupping	Shoulder/back soreness, muscle tension, colds, dampness
Herbal Prescription	Hypertension, diabetic complications, sleep disorders, GI conditions, geriatric gynecology

Regulatory Compliance

All on-site services are provided by TCM practitioners holding registered practitioner certificates issued by the Malaysia Traditional & Complementary Medicine Council (Majlis Perubatan Tradisional Dan Komplementari) under the Traditional and Complementary Medicine Act 2016 (Act 775), regulated by the Ministry of Health Malaysia. Practitioner Vincent Shihong Reg. No.: PTC-PPB2024/07214; Practitioner Natalia Caien Reg. No.: PTC-PPB2026/15538.

* All treatments follow standard TCM clinical protocols. Practitioners carry relevant professional liability insurance. On-site emergency and referral procedures will be jointly established with the home at onboarding.
