Why partner with TCM?

- Post-surgical pain is significant; PT alone is slow and patients drop out.
- Post-stroke recovery is long; patients need acupuncture + tuina + herbs together.
- Chronic back pain and rotator cuff patients bounce between GP and PT.
- Elderly patients need passive manual work beyond active exercises.
- Families want to see "more options" rather than the same monthly routine.

What VINATH TCM brings to you

- Early post-op: Shi-family trauma tuina + acupuncture, reduces swelling and prevents adhesion.
- Post-stroke: scalp + body acupuncture and tuina, improving limb function and swallowing.
- Chronic pain: acupuncture + electro-stimulation + herbal poultice for lumbar disc and knee OA.
- Two-way referral: you send TCM cases our way; we send PT cases yours.
- Richer menu: upgrade your centre from "exercise rehab" to "integrated TCM + rehab".
